

metis® 15mm slimline solid surfaces - making life in the kitchen a daily pleasure.

#### 10 year manufacturing guarantee\*

metis® slimline solid surfaces come with a 10 year manufacturing guarantee provided the surface has been installed in accordance with the installation instructions and the surfaces have been used for their intended purpose. In addition, metis® slimline solid surfaces have been awarded the FIRA Gold Award for product excellence which ensures all surfaces are manufactured to the highest standard with the most superior materials.

#### Installation

metis® slimline solid surfaces can easily be cut on-site ready for jointing using standard woodworking tools and equipment. As with other slimline surfaces, consideration may be needed with some hobs where the hob depth affects the use of cabinets and drawers beneath. Use of a built in oven beneath a hob may require adaptation to the cabinet in order to allow sufficient clearance between appliances.

#### Minor scratching

Kitchen utensils and crockery (particularly the unglazed bases) can sometimes cause scratches that will be more evident on darker colours. The surface can be damaged by scratching or cutting with knives, so the use of a cutting board is essential. Any minor scratches can be removed easily using the grey abrasive pad and other items from the metis® Care Kit. Please refer to the 'Care and Maintenance' manual.

#### metis® Care Kit

To help maintain your metis® slimline solid surfaces, a metis® Care Kit is available from your retailer. This Care Kit contains all you need to make minor repairs to the surface including a special countertop cleaner that helps to maintain, protect and build up lustre, particularly on darker colours.

#### Our commitment to customer service

When you choose metis® slimline solid surfaces you do so secure in the knowledge that you are buying a proven, reliable product. metis® slimline solid surfaces are truly at the forefront of modern surface technology.

Our Customer Care department is on hand to offer you help, support and advice all year round.

## 15mm slimline solid surfaces for the kitchen

Ultra-thin, metis® 15mm slimline solid surfaces are designed perfectly to offer style and efficiency in the kitchen due to their slender build and shape. In addition, affordable and on-trend ultra-thin design statements can be achieved easily without the need for bespoke templating.

### metis® 15mm slimline solid surfaces place the kitchen at the heart of every home

Available in four décors that have been selected to complement almost every traditional or contemporary kitchen design, metis® 15mm slimline solid surfaces are both robust and easy to clean, giving you complete peace of mind with their superb performance and quality.

#### Slender in both design and shape

metis® 15mm slimline solid surfaces reflect the growing popularity of contemporary and transitional kitchen designs. By incorporating ultra-thin surfaces, kitchen designers can achieve on-trend slimline styling to maximise their design statement.

#### Pre-fabricated, ready to fit, quicker to fit

Ready to fit on-site, metis® slimline solid surfaces are delivered in standard sizes with all working surfaces and edges factory machined and finished, saving you both time and money on your installation. In addition, sweeping curves can easily be cut and finished on-site.

#### Square profile factory finished edges, ready for fitting

The square 1mm profile factory finished edges come as standard and gives metis® slimline solid surfaces a distinctively modern look and feel.

#### Seamless joints for a continuous finish

There is no compromising with the metis® Joining Kit that uses a tried and tested method so that seamless joints are both effortless and easy to achieve.
